Tyvek®

Optimize the Building Envelope with DuPont™ Tyvek®

DuPont™ Building Envelope Products aren't just backed by a warranty for Builders, General Contractors, and Professional Installers. They're backed by a company that for over 200 years has been dedicated to providing sustainable solutions for a better, safer and healthier life for people everywhere.

Since everyone's needs are not the same, DuPont offers both a 10-Year Product Warranty as well as a 10-Year Product and Labor Warranty. This provides your customers the added assurance that the structures you build will help protect their valuable investment for years to come.

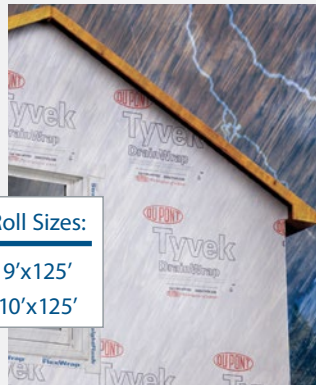

Whatever the job, our Specialists are industry-experts focused on solving any construction-related problem or need you may have.

Tyvek®

DrainWrap™

DuPont™ Tyvek® DrainWrap™ was engineered to meet the drainage needs of specific façades. It is recommended for use behind primed wood and fiber cement siding when maximum drainage is desired. DrainWrap™ is also an ideal solution when foam board is applied over flat substrates.

Roll Sizes:

9'x125'
10'x125'

Tyvek®

StuccoWrap™

With a specially engineered surface texture designed for traditional and synthetic stucco systems in both commercial and residential construction, Tyvek® StuccoWrap™ helps reduce susceptibility to cracking, improves stucco curing and channels moisture out of the wall.

Roll Size:

5'x200'

Tyvek®

Tape

Roll Sizes:

2"x55 Yards
3"x55 Yards

The crucial, final step for maximum reduction of air infiltration through wall systems is to help create a seamless, protective envelope sealed with Tyvek® Tape.

DuPont™ Tyvek® Weatherization Systems offers a 10-Year Limited Warranty, giving you the assurance that DuPont will stand behind its products. For more information contact 1-800-44-TYVEK

Flashing Products

Innovative flashing systems that work together to keep water out of the homes you build.

The range of DuPont™ flashing products are durable, tough, tear-resistant and deliver superior protection from water damage and perform through extreme temperatures (they can even handle prolonged exposure to UV light).

DuPont™ FlexWrap™, DuPont™ StraightFlash™ and DuPont™ Flashing Tape feature quick-release backing allowing for easy installation. And, the forgiving initial tack enables easy repositioning.

Your project can qualify for a 10-year limited product and labor warranty when you use a DuPont™ Tyvek® Weather Barrier, flashing products and tape.

DuPont™
FlexWrap™ NF

DuPont™ FlexWrap™ NF (No Fasteners) is a premium performance, extendable self-adhered flashing material that can be applied over a wide range of building substrates.

Sizes: 6"x75', 9"x15' & 9"x75'

DuPont™
Flashing Tape

DuPont™ Flashing Tape provides a cost-effective way to help protect the jambs and heads of today's residential windows from water intrusion.

Sizes: 4"x33', 4"x75', 6"x75', 9"x75' & 12"x75'

DuPont™
StraightFlash™

This durable flashing material is designed to protect the heads and jambs of rectangular windows. These areas can be subjected to wind-driven rain, which can find its way into the window opening and cause water damage.

Sizes: 4"x150' & 9"x125'

DuPont™
StraightFlash™ VF

DuPont™ StraightFlash™ VF (Versatile Flange) is dual-sided, self-adhered flashing made with DuPont™ Tyvek® and premium butyl sealant.

Sizes: 6"x25', 6"x125'

FlexWrap EZ

DuPont™ FlexWrap® EZ is a flexible, self-adhered tape designed with the purpose of helping create an air- and water-tight seal when installed around penetrations of all shapes and sizes. The wrap was created to be ideal for flashing around smaller electrical, HVAC, and plumbing penetrations as a fast and easy solution for improving energy efficiency and wall system durability.

DUPONT™ TYVEK® DRAINVENT™ RAINSCREEN

Tyvek® DrainVent™ Rainscreen is a three-dimensional honeycomb-textured drainage mat with attached heavy-duty filter fabric that provides:

- A flat surface for cladding application
- Optimal compression resistance
- Multi-directional channels for drainage and airflow

Peace of mind with peak performance

Tyvek® DrainVent™ Rainscreen provides assurance that water will drain out of the wall.

Ease of installation

Tyvek® DrainVent™ is easy to cut and install; lays flat; and rolls tight against corners, helping protect against poor installation and detailing errors.

Trusted quality and durability

Tyvek® DrainVent™ is part of the complete DuPont™ Tyvek® product portfolio.

10-year warranty

Tyvek® DrainVent™ has a 10-year limited product warranty and a 10-year limited product and labor warranty if installed correctly with DuPont™ Tyvek® system products.

Full support

The Tyvek® Specialist Network is available across the U.S. for additional product information and support.

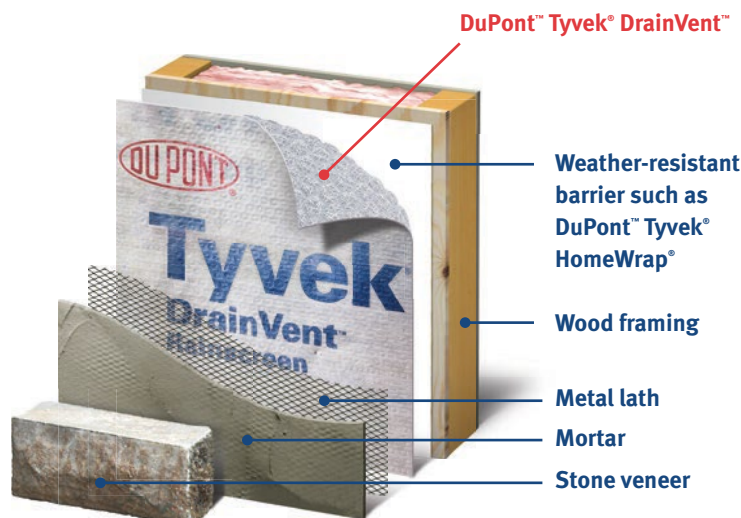

DuPont™ Tyvek® DrainVent™ Rainscreen

Applications

- Stucco
- Stone veneer
- Brick
- Wood siding
- Fiber cement siding
- Metal panel systems
- Cedar shake and shingles

Properties

- 4' x 50' (1.2m x 15.2m) roll, 200 sq. ft. coverage per roll
- 6.8mm/0.27" thickness (gap size)
- 90-day UV rating
- >100 perms based on ASTM E96 (method B)
- Class "A" fire rating per ASTM E84
- Mold and mildew resistant

10 THINGS ABOUT

WINDSORONE
PROTECTED BOARDS

1 PROTECTED TO THE CORE; FULL PENETRATION

Because unlike the other guys, we're assuming you'll actually want to cut the material at some point.

2 PROTECTED AGAINST ROT, INSECTS & MOLD

Does *not* protect against your mother-in-law, hangovers, airport security, etc.

3 DURABLE FOR EXTERIOR & SAFE FOR INTERIOR

Gold Indoor Air Quality Rating, low VOC's and California Hippy Approved.

4 WEATHER RESISTANT SYSTEM (WRS™)

Water is for drinking, not trim boards.

5 MINIMIZES THE NATURAL TENDENCY TO DISTORT

Unlike the explanation your 16 yr old told you about how the family car ended up in the pond out on Rte 1.

6 NO KNOTS; YOUR BOARDS ARE ALWAYS CLEAR

Imagine that, you can actually use every foot you pay for.

7 PROTECTION NOT DIMINISHED

By shaping, planing, sanding, fastening or molding (actual use does not void the warranty).

8 THE CUT SURFACES ONLY NEED PRIMING

No need to also apply special protection (we took care of that for you).

9 BACKED BY A 30-YEAR LIMITED* WARRANTY

The "limitation" is you have to install it correctly (for one example see #8 again).

10 BUILD AMERICA: MANUFACTURED IN THE U.S.A.

Because everything else you bought was made in China.

INSTALLATION REMINDERS*

PRIME ALL CUTS!

MOISTURE CONTROL¹: Acclimate to the environment. For interior trim, store inside the structure until the products reach approx 8% moisture content. For exterior trim, store in locations such as a garage that is not heated & is well ventilated until about 14% moisture content. Do not install exterior trim boards with a moisture content over 18%. ¹see www.windsorone.com/moisturecontrol

KEEP MATERIAL COVERED: Store on stringers and out of the weather.

INSTALL 6" ABOVE GRADE: Trim should be installed always at least 6" from ground.

INSTALL 2" ABOVE ROOF: 2" breaks are crucial on the roof and flat surfaces (porches, decks, etc).

1/4" FROM FLASHING: Flashing is imperative; and always maintain a 1/4" gap for a capillary break.

*SEE FULL INSTALLATION INSTRUCTIONS. WindsorONE should be stored, installed, handled & maintained correctly for the best performance.

For complete installation guidelines & the WindsorONE Protected warranty, visit WindsorONE.com/install or call 888.229.7900.

Innovative Trim and Siding for the way you build

LP® SmartSide® Trim and Lap Siding products are made from engineered wood for exceptional durability and beauty. They are strong yet light-weight and come in 16' lengths to help speed up installation and reduce the number of seams on your home by up to 33%. Much like natural wood, LP SmartSide products help you add craftsmanship and warm appeal to any style of home.

STRENGTH AT THE CORE

With more than 18 years of successful performance, it's easy to see why LP® SmartSide® is one of the fastest-growing brands of siding materials today.

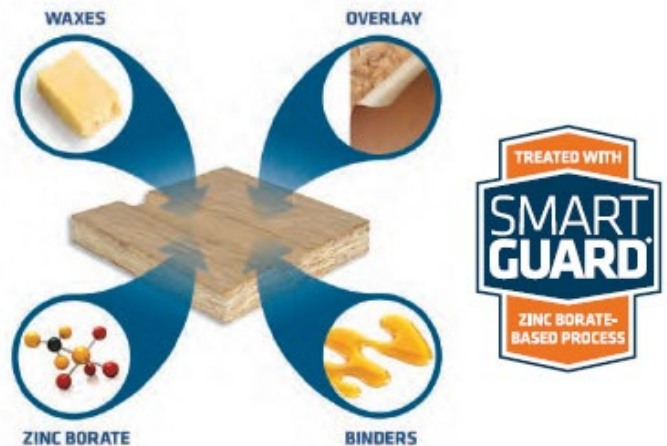

GREAT WARRANTY

LP has your back with an industry-leading warranty that offers exceptional peace of mind for your home. A 5/50-Year Limited Warranty that provides a 5-year, 100% labor and replacement feature and a 50-Year Prorated Limited Warranty on the product. Visit LPSmartSide.com for complete warranty details.

EXTRA PROTECTION

SmartGuard® helps LP SmartSide products withstand extreme temperatures, heavy humidity, arctic freeze thaws and everything in between. This process treats to the core with four components of protection that add strength and resist fungal decay and termites.

©LP and SmartGuard are registered trademarks of Louisiana-Pacific Corporation and are used here by permission.

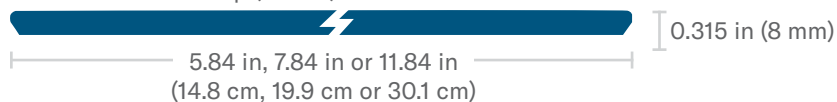

NEW LP® SMARTSIDE® SMOOTH TRIM & SIDING

- With advanced durability for longer lasting beauty
- Engineered wood strand technology
- Holds up in extreme weather including moisture, hail, freeze/thaw cycles, and up to 200 mph wind gusts
- Treated with the SmartGuard® process for superior protection against the weather, fungal decay and termites
- 16 ft length can result in faster installation and fewer seams
- Pre-primed for exceptional paint adhesion
- Backed by an industry-leading 5/50-year limited warranty

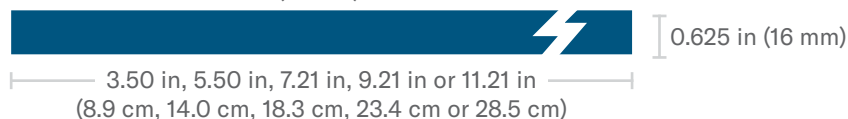

LP® SmartSide® Smooth Trim & Siding is available in a wide variety of widths.

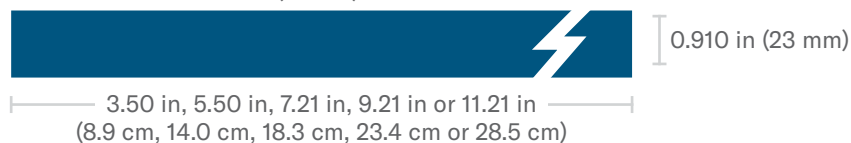

38 Series Smooth Lap (strand)

440 Series Smooth Trim (strand)

540 Series Smooth Trim (strand)

From modern to historic, LP® SmartSide® Smooth Trim & Siding can help you accommodate a wide range of designs without compromising on durability.

For product catalog & complete warranty details, visit LPSmartSide.com

Driving Innovation.

Introducing LP Expert Finish, a new prefinished siding option with the product features and durability you've come to expect from LP SmartSide Trim & Siding—now in color.

Thanks to the new LP SmartSide ExpertFinish Lap, professionals can avoid the need for seam caulking, joint molds or pan flashing at butt joints.

Designed For Beauty & Durability.

Advanced Durability

Engineered wood technology offers superior protection against the elements.

16 Foot Length

Can allow for faster installation and less jobsite waste.

Fewer Seams

Can result in a cleaner, more elegant look.

Industry-Leading Warranty

Backed by a 5/50-year limited warranty.

How to Calculate

all calculations should round up
to ensure enough material

HOW TO CALCULATE THE AMOUNT OF SIDING NEEDED

Example – Area to cover: 1,000 ft²

For 5" exposure, add 3% to the area to cover

$$1,000 \text{ ft}^2 \times 1.03 = 1,030 \text{ ft}^2$$

$$1 \text{ box} = 25 \text{ ft}^2$$

$$1030 \text{ ft}^2 = 41.2 \text{ (round up to 42 boxes)}$$

Maibec Stave Lake™

Genuine Western Red Cedar Wood Siding

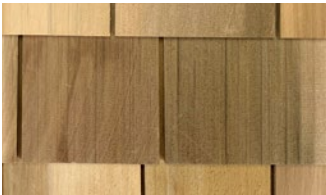

Product
Availability Sheet

STAVE LAKE CEDAR

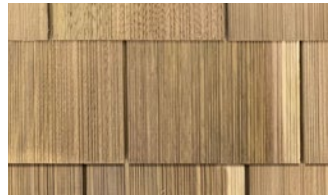

Maibec manufactures Western Red Cedar shingles through their Maibec Stave Lake Genuine Wood Siding line. These WRC products are sourced from the most established Cedar Shingle and Shake Bureau (CSSB) graded mills resulting in consistent product quality across grades, widths and thicknesses. With a combined 150+ years in milling experience, quality milling and manufacturing processes, and superior wood finishes and application methods, you can trust Stave Lake Cedar shingles from Maibec for long-lasting Western Red Cedar beauty.

FEATURED STYLES AND PROFILES

A Superior Substrate for Painting Trim

PaintPro Technology is a revolutionary development in cellular PVC for exterior trim. Eliminate painting prep and slow dry times while still providing a superior bond with paint for longer-lasting beauty. Say goodbye to paint chipping, peeling, and cracking on exterior trim that occurs from moisture absorption of porous materials.

- No sanding, priming, or other special prep needed
- Faster dry times
- Superior paint adhesion
- Stronger bond with paint prevents splits, chips, or flakes
- Long-lasting, low maintenance performance

Paint Requirements

- Must be painted within 180 days after installation
- For lighter colors with a Light Reflective Value (LRV) 55 or greater: paint can be 100% acrylic latex exterior paint or a pre-set color from a paint formulated for vinyl siding
- For darker colors with LRV Less than 55: use pre-set color from a paint formulated for vinyl siding or a coating with solar/heat reflective pigments
- For custom colors, use a coating with solar/heat reflective pigments

PVC Trim with PaintPro® Technology

PVC Trim Engineered for Paint

Problem Wood Trim

Paint Failure:

Chipping, Peeling, Warping, Rotting and Replacing.

Solution PaintPro®

Durable Finish:

Superior bond with paint for long lasting, low-maintenance beauty.

AZEK® PVC Trim with PaintPro® Technology was engineered to be the lowest maintenance paintable in the market with superior paintability, fast dry times and long-lasting paint adhesion

 Mold & Moisture Resistant

 Weather Resistant

 Termite & Insect Resistant

 Will Not Rot, Split, Splinter, Warp or Swell

 Enhanced Paintability

Better Fastener, Better Aesthetic

When using PaintPro Trim, choose Collated PaintPro Cortex® plugs and paint to match trim color.

Use AZEK adhesives, sealants and accessories for fast, easy installation and enduring strength.

Learn more at AZEKexteriors.com/products/adhesives-and-tools

Additional 15-Year Paint and Labor Warranty Available

AquaSurTech D100 paint and TruStain products add another layer of premium to PaintPro. Choose from solid or wood grain finish. Brush or spray any color paint to form a powerful molecular bond with the trim substrate. Minimal heat build (even in dark colors) and a flexible finish coating protect AquaSurTech from fading, flaking or peeling. AquaSurTech's 15-year limited warranty protects their paints and stains while the AZEK® Limited Lifetime Warranty protects the substrate.

Beautiful, durable and easy to install

The #1 brand in trim has a premium siding solution designed to reduce the installation frustrations of traditional siding materials while providing longer-lasting durability. AZEK[®] Shingle matches the attractive texture of cedar shingles while adding the performance and low-maintenance benefits of rot-proof PVC building materials. Leveraging our innovative new PaintPro[®] Technology, AZEK Shingle offers a faster dry time, superior paint adhesion and long-lasting paint performance. Delivering classic beauty with superior durability has never been so effortless.

Effort, less.

Less Risk

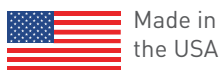

- Industry leading Lifetime Limited Warranty
- Enhanced paintability, superior paint adhesion and long-lasting performance
- Moisture-resistant; will not rot, delaminate, decay, split or splinter
- Insect-resistant; unappetizing to destructive pests

Less Hassle

- No special saws or ventilation equipment required for cutting, no silica dust
- No need to seal cut edges and scrapes for water protection
- Up to 60% lighter than fiber cement
- Flexibility and easier handling help prevent shipping or on-site breakage

Less Limitation

- Looks great with wide range of siding and trim materials
- Keyway width and tab variation creates beautiful and natural aesthetic
- Approved for use in ground contact and roof line installs
- Ideal for high moisture, coastal and extreme weather areas

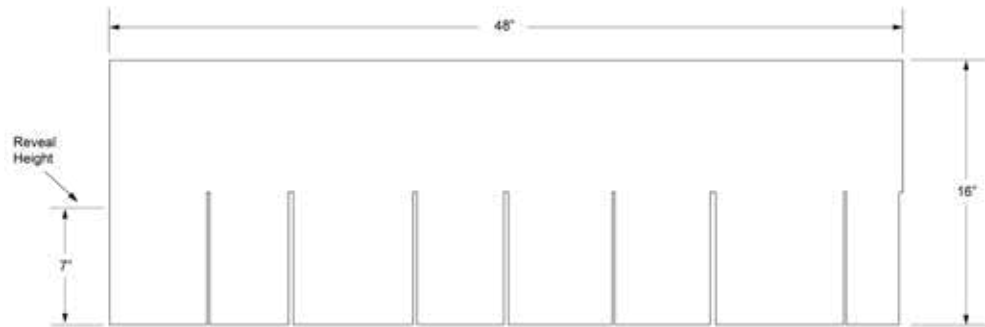

Made in
the USA

Available in Two Classic Styles

Straight Edge Shingle

Consistency with a dash of variety. Uniform horizontal lines with varied width tabs and keyways for the most natural-looking shingle to beautifully complement modern or classic exterior architecture.

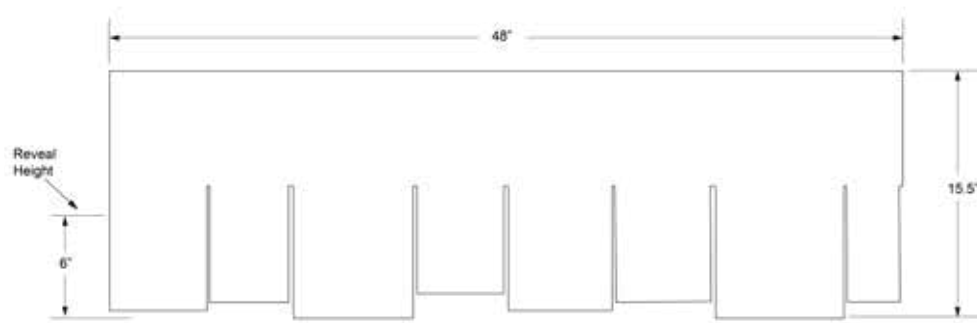

Straight Edge

- 7" reveal
- 43 panels per square

Staggered Edge Shingle

Patterns with individual character, dimension and diversity. Each random edge panel enhances the overall pattern for an amazing exterior picture. Beautiful variety in both vertical and horizontal lines.

Staggered Edge

- 6" reveal
- 50 panels per square

Easy to Install, Easier to Maintain

Our designs and innovations come to life with contractors constantly in mind. Save time and money with beautiful, diverse materials that are easier to install with long-lasting performance.

Installation Benefits:

- No special tools required
- Engineered polymer is lightweight and durable
- Flexible, durable material helps prevent on-site breakage
- No need to seal cut edges and scrapes for water protection
- Route and cut without splitting
- Uniform finish; no surface irregularities to work around

Low-Maintenance Performance:

- Moisture-resistant
- Will not rot, split, splinter, peel, warp or swell from moisture
- Maintains beautiful finish even through harsh weather
- Insect-resistant; unappetizing to destructive pests

TimberTech AZEK® Decking

Discover the decking that is revolutionizing designer outdoor living spaces. Bring stylish sophistication and premium performance to backyards everywhere. Made from the most advanced material technology in both the cap and core, TimberTech® AZEK® Decking is the most resistant to the elements, stays cooler on sunny days, and offers up to 40% better slip resistance than competitors. With narrow, standard, and wide width boards available, designing a truly one-of-a-kind deck is easy.

Expand Your Outdoor Space

Ideal for second-story decks, DrySpace is an under-deck water management system that collects and channels moisture so homeowners can make the most of the space below. It is easily attached to new or existing deck joists, and comes in two colors that lighten and brighten the area under your deck. DrySpace is made of solid extruded vinyl for maximum strength, durability, and weather resistance.

Colors:

DrySpace Benefits:

- Expand your outdoor living space
- Keeps furniture and decor protected from the elements
- Creates a clean, finished appearance
- Opportunity to harvest rainwater from gutter or downspout to save on outdoor watering
- Unlike other products on the market, DrySpace can be installed with new or existing decks

DrySpace Details:

- Compatible with TimberTech[®] AZEK[®], PRO[™], and EDGE[™] Decking
- Kits available for 12" on-center spans in 12' lengths and 16" on-center spans in 12' and 16' lengths
- Also available in bulk as individual components
- Available in two colors: Bone or White
- 25-Year Limited Warranty for residential applications

DrySpace Components:

DrySpace kits and individual components are available to fit most common deck dimensions. The kits include all of the parts needed for an easy, seamless installation using standard tools.

western red cedar

Western Red Cedar is one of North America's great renewable resources. Slow growing and naturally durable, Western Red Cedar has one of the longest life spans of any North American softwood.

It is free from pitch and its heartwood has natural decay resistance. Its low density gives it an insulation value superior to most other species. Light weight, easy to work, easy to finish, possessing outstanding dimensional stability, Western Red Cedar is a preferred wood for nearly all purposes where attractive appearance or resistance to weather is important.

Designed to eliminate the unsightly mushrooming that can occur in composite deck lumber with most ordinary screws and even some composite screws.

SMART-BIT. PRO PLUG™ SYSTEM

FOR DECKS, FLOORING AND WOODWORKING

PRO PLUG® SYSTEM FOR Wood

The Pro Plug® System for Wood is a superior and easy to install plug system for PVC Decking. The system consists of two components:

PRO PLUG® WOOD TOOL: The patented tool pre-drills and counter-bores to perfectly match the system's screws and plugs.

PRO PLUG® WOOD DECK KITS: Plugs are made from actual face grain wood material, so they match perfectly, with many species to choose from. Screws are available in Stainless Steel for decking and zinc plated for flooring. The patented Pro Plug Glue Nozzle coats the side of the hole for maximum holding power (glue not included).

CAMO™

*Changing the Face
of Decking™*

THE CAMO™ HIDDEN DECK FASTENING SYSTEM works on any treated lumber, hardwood, cedar, composite or PVC deckboard. CAMO™ deck screws and a CAMO™ Marksman tool combine to deliver a fastener-free deck surface at a price that makes getting the job easy and installing the deck even easier.

The FastenMaster® Cortex™ Fastening System is the fastest, easiest way to conceal the heads of your deck screws on specific composite deck types.

Available for use with market leading composite and PVC deck boards.

The FastenMaster® TrimTop™ is a stainless steel trim screw engineered for use in a cellular PVC decking like AZEK® Deck and cedar, ipé and mahogany decking.

Color matched for AZEK® Deck.

Specially designed to eliminate the mushrooming effect caused by standard deck screws in composite deck materials.

No More Mushrooms!

No Pre-drilling. They ZIP right in! Engineered for multi-ply LVL, LSL and PSL applications.

- Approved for single-sided installation
- Higher side load capacity with fewer fasteners saves time and labor
- Prevents gapping or cupping between plies

Faster, Easier, Stronger than 1/2" lags.

- The first fastener engineered to attach deck ledger boards to a wooden house structure with no pre-drilling.
- Built-in washer head design eliminates the need for additional washer

No Pre-drilling. Stronger than 3/8" lags.

The FastenMaster® TimberLok® replace 3/8" lag screws and enables you to complete wood-to-wood projects faster, easier and stronger.

The speed of a LOK fastener. The strength of a through-bolted connection.

- No Predrilling
- Installs with an 18 volt cordless drill
- No drill bits or wrenches required
- Galvanized coating meets IRC ACQ corrosion requirement
- Lifetime performance guarantee

Photographs should not be used as a reference for fastening patterns

No Pre-drilling. Faster, Easier, Stronger than 3/8" lags. Non-Countersinking Head.
