

INSPIRING HEALTHY SPACES— EDUCATION

CORIAN® SOLID SURFACE

Features & Benefits

DURABLE AND TOUGH

Corian® keeps its good looks and survives the impact nicks and cuts that can occur with daily wear and tear.

EASY-TO-CLEAN

Corian® has a non-porous surface that prevents dirt and stains from penetrating the material. Marks and stains stay on the surface and can easily be removed with a Scotchbrite® pad and standard cleaner.

NONPOROUS

Corian® is nonporous and hygienic. Its smooth surface does not allow liquids to penetrate and that makes it easy to clean. Bacteria and mold have nowhere to take root. When Corian® looks clean, it really is clean.

RENEWABLE

Color runs all the way through so heavy stains, graffiti and scratches can be repaired if necessary.

SEAMLESS

Color coordinated joint adhesives bond Corian® solid surfaces with inconspicuous seams. This seamless look of integrated Corian® countertops, sinks, and covered backsplashes also means there are no crevices to trap dirt and bacteria.

Weathered Concrete

Trust your school's surfaces to the same material the finest hospitals trust.

When it comes to surfaces the healthcare industry can rely on, they consistently look to Corian® Solid Surface. That's right, the very Corian® surfaces that have been around for over 50 years, are trusted by healthcare experts all over the world for their hygienic properties. Because Corian® is non-porous and can be fabricated without seams, there is nowhere for viruses, bacteria, mold and mildew to take hold. Today's climate calls for vigilant disinfection and cleaning of surfaces. When a space is used by many students and staff, selecting material that does not harbor trouble is paramount. Corian® Solid Surface is that material.

HEALTHY UPDATE

COST-EFFECTIVELY REPLACE OR CAP HIGH-TOUCH AND HIGH-TRAFFIC SURFACES

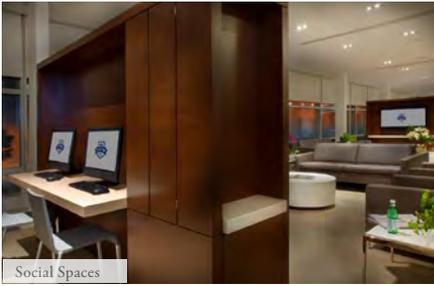

Old fixtures can be beat up, hard-to-clean and likely capable of harboring bacteria and germs. By replacing or capping existing desk, restroom, cafeteria and seating area surfaces, institutions can cost-effectively update their current furniture with a new design that is both fresh and healthy.
